

PRESS RELEASE

## **Application Optimised Glass Laboratory Reactors**

As a respected supplier of off-the-shelf laboratory reactor systems, **Asynt** has the in-depth knowledge and glassware manufacturing expertise to also offer **bespoke glass reactor vessels** to meet the exact demands of your application or project.

VAT No: GB 838 5592 82

## **Examples**

of bespoke glass laboratory reactors designed and manufactured by Asynt have ranged from tens of millilitres to 50 litres in capacity.

## **Asynt**

was commissioned by a polymer resin manufacturer producer to develop a 20-litre jacketed glass laboratory reactor vessel with a bespoke 30mm diameter zero dead space bottom run off valve. Because of the viscous nature of the reaction material this valve was essential to the project, allowing for simple product sampling and ensuring easy and efficient transfer of the reaction material. The customer was so pleased with the operation of the resulting glass reactor that they ordered a second identical system.

## **A contract research organisation,**

specialising in the synthesis of photosensitive molecules, tasked Asynt to design a 1-litre glass laboratory reactor to minimise light degradation of their high value molecules during reaction. This was achieved by manufacturing the complete reactor system using amber-stained glass.

The Asynt team has over 30 years of dealing with custom glassblowing solutions and can help you with many of your custom glass reactor needs; whether you require just a small adaption or a fully bespoke glass reactor system.

**Asynt**

**Ltd.**

**Asynt is a leading supplier** of affordable products, consumables and services for chemists in industry and academia. With staff of trained chemists - Asynt can draw upon this in-depth applications knowledge to provide a high level of customer support for its DrySyn Heating Blocks, Controlled Lab Reactors, Synthesis Tools, Evaporators, Circulators, Temperature Control Systems, Vacuum Pumps and Laboratory Safety Equipment.
