

PRESS RELEASE

Versatile Heating Block Starter Kit

Designed to enable clean, safe synthesis – the **DrySyn Classic Starter kit** from **Asynt** is an attractively priced package for labs looking to undertake heated reactions in the most commonly-used round bottomed flasks (50, 100, 250, 500 and 1000ml).

This versatile starter kit also includes heat resistant handles which enable fast, simple, and safe lifting of your heated reaction flask.

Used in combination with a standard hotplate stirrer, DrySyn Classic heating blocks are widely proven to outperform the heat-conducting properties of oil baths. They pose a far lower fire risk and eliminate the messy and time-consuming need to remove residual oil contamination from the outside of your glassware. In addition to accelerating your chemical reactions - DrySyn Classic heating blocks ensure a safer, cleaner, healthier working environment. The DrySyn Classic also provides a superior alternative to heating mantles.

The solid anodised aluminium construction of the DrySyn Classic delivers outstanding thermal and magnetic transfer efficiency and the durability suitable for use in any laboratory environment. Designed by chemists for chemists, the DrySyn Classic provides full unhindered visibility of your reaction
