Compact Camera-Based 2D Rack Reader

The DP5 Mirage Rack Reader

from **Azenta Life Sciences** delivers a cost-effective solution for reading SBS format racks in a compact low-height design.

Benefiting

from unique patent pending technology, the DP5 Mirage sets new standards for 2D code readers. With easy, out-of-the-box set up delivered pre-calibrated and ready to read, the DP5 Mirage is the perfect workhorse rack reader for busy life science laboratories.

As the most compact camera-based 2D rack reader

available, the small footprint of DP5 Mirage is highly economical as it relates to your valuable bench space, and it can be readily integrated into almost any laboratory workflow protocol.

The DP5 Mirage

is part of the most advanced generation of coded tube and rack readers from Azenta – a world leader in sample tracking and management for life science labs. Using fast and reliable cutting-edge communications and control protocols, DP5 Decoding Software simplifies the operation of camera-based readers for users, while simultaneously offering greater networking ability and enhanced security features for more demanding applications in two add-on packages.

AZENTA
LIFE SCIENCES

Azenta, Inc.

is a leading provider of life sciences solutions worldwide, enabling impactful breakthroughs and therapies to market faster. Azenta provides a full suite of reliable cold-chain sample management solutions and multiomics services across areas such as drug development, clinical research and advanced cell therapies for the industry's top pharmaceutical, biotech, academic and healthcare institutions globally. Our global team delivers and supports these products and services through our industry-leading brands, including GENEWIZ, FluidX, Ziath, 4titude, Limfinity, Freezer Pro, Barkey, and B Medical Systems.

Azenta is headquartered in Burlington, MA, with operations in North America, Europe, and Asia. For more information, please visit www.azenta.com.
