

## PRESS ANNOUNCEMENT

### **Intuitive software for multi-detector GPC/SEC**

**ParSEC Advanced** software from **TESTA Analytical** is designed to acquire and analyze data from **GPC /SEC systems** fitted with any combination of refractive index, light scattering, UV, and viscosity detectors

**Caption:** ParSEC Advanced software (courtesy: TESTA Analytical)

### **Traditionally**

the complexity of data acquisition, storage, visualization, analysis, and reporting from multi-detector GPC/SEC systems has limited its effective use to chromatography and macromolecular characterization specialists.

### **ParSEC**

With all necessary tools and options accessible with a single mouse click – ParSEC sets a new benchmark for ease-of-use and productivity.

## **ParSEC**

is fully compatible with all GPC/SEC detectors and systems including those from TESTA Analytical. This powerful, yet easy-to-use software package includes many attractive and practical features that have been written for the benefit of even occasional users. Features include “function specific” views, ensuring the uncluttered display of information relevant to the task at hand, plus customizable display, and annotation options for all graph types. All operating conditions, raw data files, analysis methods, related calibrations, results, and sample information are stored in a database for easy archiving and retrieval.

## **For further information**

about ParSEC Advanced software please visit <https://www.testa-analytical.com/gpc-sec-chromatography.html> or contact TESTA Analytical on +49-30-864-24076 / [info@testa-analytical.com](mailto:info@testa-analytical.com).

## **TESTA Analytical Solutions**

is a leading specialist supplier of liquid chromatography instruments and detectors. Drawing upon over 30 years' experience, TESTA Analytical Solutions has established itself as a respected creator and supplier of top quality, innovative, high performance chromatography instrument kits, and detectors with OEM clients around the world.
