

## **PRESS RELEASE**

### **Network enabled remote sample management**

#### **Using high-speed,**

web-based communications protocols - **DP5 Network** from **Ziath** sets the standard for **2D rack decoding software** that can be run from a PC, phone, tablet or any other network connected device.

#### **This powerful software**

application enables full control of multiple tube barcode scanners on the same LAN to be operated from one or more devices connected to that LAN.

#### **Using DP5 Network**

you can plug all your tube rack readers and scanners into the LAN directly and run them from a PC in your office or somewhere else in the building. This flexibility enables you to have your reader / scanner conveniently near the freezers or compound stores and the results on your desktop or phone.

#### **DP5 Network**

is fast and secure - it allows you to export tube positions and barcodes in more formats than anyone else - JSON, XLS, CSV, Text, PDF, PNG and Python and then send the data
